## PROJECTS

### PSX Halal Tracker

- Zero-cost Shariah-compliant stock tracking assistant built with Python, Supabase, pandas-ta-classic, GitHub Actions, and Gemini Flash.
- Implemented automated data ingestion, halal universe screening, technical indicator computation, and market cap ranking.

### ServeEase — Restaurant Ordering & Management Platform

serveease-next.vercel.app

- Contactless dine-in ordering system: each table has a dedicated QR code, orders route directly to a real-time kitchen display screen, eliminating the need for waitstaff to take or relay orders.
- Built an AI recommendation feature that suggests menu items based on party size and budget input by the customer.
- Implemented role-based access for three user types: kitchen staff, table service, and owner/admin, with menu management controls reserved for the admin role.
- Built with Next.js, React, and Tailwind CSS.

**Tareekh-ky-Jhonky — Pakistani Heritage Scanner**

*AI Seekho 2026 Hackathon, Phase 2 Finalist (PKR 2.5M prize pool)*

- Built a RAG-based artifact recognition app with audio walks and inscription translation, using Gemini 1.5 Pro, Google ADK, and FastAPI, deployed on Google Cloud Run.

**SpeakUp Coach — AI Interview Coaching Platform**

*Bano Qabil x Alibaba Cloud AI Hackathon Pakistan 2026*

- Built an interview coaching platform for first-generation students with Urdu feedback delivery, using React, Supabase Auth, Whisper, FastAPI, PostgreSQL, and Claude/GPT API.
